

IDDEX

For Hotels

 AdriaScan

IDDEX for Hotels

IDDEX is a software solution that uses high speed [passport/ID scanners](#) to capture correct data from documents and transfer them directly to hotel software.

All-in-one solution for automated data entry from scanned identity documents into hotel PMS.

Within a few seconds, it auto-populates guest profile with data from passports, ID cards and drivers' licenses.

Enables easy connection of almost any passport/ID scanner with over **100 Hotel PMS.**

Used by **thousands** hotels

IDDEX is designed to help front office staff to easily identify guest, automate and speed-up check-in process and digitalize guest records. Thousands of hotels globally already adopted passport/ID scanner as a common standard and it is becoming an irreplaceable tool for [automated data capture](#) and [document authentication](#).

Key benefits

CHECK-IN

Reduce guest check-in time by using high speed passport/ID scanners

ACCURACY

Avoid typing errors and get more accurate guest data

DIGITALIZING

Eliminate photocopying and store digital images if needed

LEGAL

Comply with local legislation and be in line with GDPR

HOSPITALITY

Focus valuable time to personalize guest service instead of typing data

SECURITY

Prevent unwanted individuals and increase security for your guests

Interfaces

IDDEX is used to read and transfer data from scanned document to business applications. It does not contain database and **with interface** to hotel software [PMS] it enables **automatic data transfer** directly to guest profile.

Scanning process is started from hotel software which makes data collection easy and painless process for front desk staff.

IDDEX API allows seamless and **secure** integration with any software, no matter is it cloud or desktop-based solution.

100+
interfaces

Document Readers

Thales Gemalto Document Readers supplied with AdriaScan IDDEX are designed to efficiently execute various operations from a simple image capture to the most advanced document authentication forensic tests.
